Force Technologies Partners with Integra Technologies

November 16, 2011 - [Force Technologies Ltd](http://www.forcetechnologies.co.uk) of Marlborough UK has reached an agreement to partner with [Integra Technologies LLC](http://www.integra-tech.com) to supply semiconductor IC packaging, testing, qualification, high reliability, obsolescence and counterfeit protection services to the Military, Space and Aerospace customers in the Europe, Middle East and Africa region. In an exclusive agreement, Force will act as the technical partner and sales operation to "front end" all Mil/Aero/Space opportunities within the region, offering clients the total facilitation of solutions to obsolescence and test.

Force Technologies, is one of the largest suppliers of ceramic after-market components used as replacements for obsolete devices using original manufacturers die and custom circuits. Force has been involved in the specification, supply and support of Hi-Rel, Military, Aerospace and Space products to many EMEA based International companies since 1986.

"This agreement brings together two of the most comprehensive, proficient and knowledgeable providers of aftermarket semiconductor devices and technical services to the obsolescence and test market," said Mike Salmon, CTO of Force Technologies. "The partnership with Integra allows us to provide our current and potential customer base with even more technology options to meet the industries' ever-changing requirements."

"Integra is very pleased to be working with Force," said Joe Holt, Vice President of Business Development at Integra Technologies. "The combined product and service offerings of our two companies will provide comprehensive access to virtually any IC technology solution not available as a standard product in the industry."

About Force Technologies

Force Technologies Ltd. provides a continued manufacturing source for discontinued or obsolete semiconductors, such as Memories Microprocessors, Linear, Logic, Opto and discrete, devices in order to support many legacy products in all industries. Force Technologies Ltd. is a privately owned company, established over a quarter of a century ago. From our purpose-built premises in Wiltshire and through a global network of manufacturing partners, we manage the design and manufacture of obsolete electronic components for customers around the world. Accredited with BS EN ISO 9001 and AS9100 for over 20 years. Force Technologies, the first true supplier of confidence.

About Integra Technologies

Integra Technologies is one of the largest and oldest IC test labs in the U.S. and Europe. Our company has been satisfying customers for over 28 years with a full range of Test Development, Final Test, Characterization, Wafer Probe, ESD, Latch-Up, Qualification services (HTOL, HAST, Temp Cycle, etc.), Upscreening and Counterfeit Detection Services. We have a large and experienced test engineering group of staff that has developed over 5000 test programs that cover every device technology including RF, Mixed Signal, Digital, Linear and Analog with pin counts ranging from 2 pins to 2000 pins. Integra is ISO-9001, AS9100, ITAR, and DSCC certified as well as being a DMEA Trusted source.
